

MODEL PD

THE AUTOMOTIVE INDUSTRY IS WITNESSING A TRANSFORMATIVE MOVEMENT TOWARDS ELECTRIFICATION

particularly evident in the recent advancement of electric police vehicles. Notably, the MODEL PD exemplifies this shift as the first all-electric, duty-ready police vehicle based on the Tesla Model Y platform. This innovative model is specifically designed to meet the rigorous demands of law enforcement, accelerating from 0 to 60 mph in under five seconds, ensuring readiness in critical situations.

The MODEL PD also boasts enhanced cargo capacity and the superior efficiency and green-initiative sustainability associated with electric vehicles, representing not just an evolution in police technology, but a pioneering approach to the future of policing and public safety.
